

Reduce Costs, Improve Outcomes & Advance Health Equity

As the nation's leading provider of staff-assisted, SNF onsite dialysis, Dialyze Direct's innovative model of care is proven to:

- Reduce rehospitalizations and ED visits
- Simplify & speedup the discharge process
- Expand care choices for complex, long-length-of-stay patients
- Eliminate transportation costs
- Improve health equity

5 SMART REASONS TO CHOOSE

1

Decrease rehospitalization & ED trips*

> 30% reduction in rehospitalizations due to improved fluid management.

** Frequently hospitalized dialysis patients cost Medicare over \$220,000 per year.*

2

Fast, efficient, & simplified placements

With more than 170 locations in 13 states, Dialyze Direct and its SNF partners offer rapid, easy patient discharge.

Solve THREE problems with ONE referral:

- SNF placement
- Dialysis placement
- Transportations (no longer required)

3

Reduce delays & accelerate discharge

Dialyze Direct SNF partners provide a clinically appropriate care site for difficult-to-discharge and long-length-of-stay ESKD patients, including tracheotomy and vent-dependent patients.

4

Optimize patient experience & enhance quality of life

Onsite, more frequent dialysis means:

- Up to 95% reduction in dialysis session recovery time
- Improved rehab outcomes
- Significant reduction in blood pressure
- > 90% reduction in access site infections
- Dramatic reduction in communicable infections (ie. COVID-19)

5

Improve health equity

Many Dialyze Direct SNF partners offer home hemodialysis. This proven clinically superior modality is often unavailable to members of historically marginalized communities.
