

# 7 Questions

## SNF operators should ask before choosing a dialysis solution

### 1 How much SPACE is needed for a onsite 6-chair conventional dialysis den vs. a 6-chair MFD\* den?

Each modality has its own unique requirements. As the only onsite provider to offer both, we help you determine the best fit for your building.

### 2 What are the construction COSTS for an onsite 6-chair conventional dialysis den vs. a 6-chair MFD\* den?

The cost variables depend on treatment modality, available den dimensions, and specific building requirements. Our facilities experts help you understand the potential construction costs for both treatment types for your location. You choose the solution that fits your building and budget.

### 3 Can you help us GROW the number of referrals to our building?

Yes! As our partner, you enjoy access to our vast network of referral sources and payers – the largest of any onsite dialysis provider. Plus, our teams are strategically located to meet with discharge planners, hospital liaisons, and help with patient placement.

### 4 Which modality is better for maximizing patient REHAB time?

Chair and recovery times for each modality can impact scheduling other therapies. Our team helps you understand the variables so you can make a decision that fits your patients' needs.

### 5 How FAST can a patient be approved for admission?

The typical response time is generally 2 hours or less. Dialyze Direct created an automated process to manage the complex approval process so dialysis patients are admitted quickly.

### 6 Which PAYERS consider Dialyze Direct 'in-network'?

Dialyze Direct is contracted with more than 80 payers and growing. This gives your SNF access to a strong payer referral network to help you increase referrals as well as maximize admissions.

### 7 What makes Dialyze Direct the BEST choice for onsite dialysis?

Our care model is shaped by clinically validated and published research on treatment modalities for the SNF population. Plus, with more than 170 locations, we are largest provider in the U.S. and the only one to offer both conventional and MFD\*.

\*More frequent dialysis (MFD) generally refers to 5-day-a-week treatment using a home dialysis machine. Conventional dialysis generally refers to 3-day-a-week treatment using a clinic dialysis machine.
